

## Fnac Darty Information

Following the government's announcements and in accordance with the public authorities and the major retail chains, Fnac Darty is postponing the organization of the Black Friday commercial operation until December 4, subject to the reopening of physical stores on the week-end of November 28. We are satisfied and supportive of this consensus position. The postponement of Black Friday will thus make it possible to carry out this operation, which is acclaimed each year by our customers, in a multi-channel situation, naturally with the fnac.com and darty.com sites but also our entire network of stores, which will benefit from further strengthened security protocols.
